 DURAVIT

Starck 3

Philippe Starck takes us into a world where the superfluous becomes superfluous. Into a bathroom that makes do without pomp and circumstance. With his acute sense for essentials, the designer unmasks decorations and ornaments for what they are: Kitsch. He proves this point with his bathroom ranges Starck 1 and Starck 2 – a designer's symposium on minimalism, made by Duravit. And now we are taking it one step further. More sizes at minimised prices. For design novices as well as for the advanced. Outstanding and unmistakable. Complete and ideal for large and small projects: offices, schools, hotels, airports and industry. Or for your home. Starck 3 offers suitable solutions for every space, meeting all national and international standards. Starck 3. Making a splash.

C = Compact version, width of this version identical, reduced depth.
 ♀ = Med version, without overflow, optional with tap hole.
 ♂ = suitable for wheelchair users, barrier-free
 xx = 00 White (Alpin), 47 Pergamon
 ♂ vertical outlet ⇌ horizontal outlet

Beautifully simple: the rectangle as a space-saving basic shape for washbasins with low back panel.

Compact sizes: smart solutions for washbasins of different depths and a width of 600 mm and 550 mm.

Complete bathroom: all-purpose, all sizes. From corner handrinse basins to furniture washbasins.

Practical: Starck 3 Med, without overflow, ideal for surgeries and hospitals. Also as Compact version.

Brilliant combinations: Washbasin with the new jelly cube vanity unit, furniture washbasin, with either pedestal or siphon cover, to go with Duravit furniture ranges like in the mood, X-Large and Starck 1.2.3.

Same width, different projection: on left, the 600 mm wide Starck 3 washbasin and on right the compact version.

How many elements does a designer really need? Line, circle and square are the basics of every object designed to last longer than just one season. Philippe Starck knows this – in his new bathroom range he is doing away with the unnecessary. The Starck 3 washbasin derives its distinctive character from its basic rectangular shape, an all-round rim and a low back panel. In contrast to semicircular washbasins of comparable size, the rectangular shape offers a wider variety of space-saving sizes. So smart, so brilliant, so very Starck.

Clever material mix: The Starck 3 furniture washbasin with ceramic rear panel finds a very supportive partner in the translucent plastic jelly cube vanity unit, which is available in snow white and ice-blue.

The Starck 3 furniture washbasin, 850 mm wide, with base unit from the x-large furniture range in Helsinki Birch (Décor) and 700 mm wide with x-large in dark Wengé (Décor).

-  = installation from above

The toilet: a fundamental part of every bathroom and yet often neglected by most designers. Not so by Philippe Starck for Duravit. Treated with the same care as everything else, the Starck 3 toilet with concealed trap becomes the unmistakable highlight of the range. Well-designed appearance shouldn't compromise on performance: all toilets are equipped with Dual-Flush and both toilet and bidet are available as a floorstanding and wallmounted version. A urinal with matching ceramic partition completes the wide range. In fact, Starck 3 suits all requirements. Not only for public areas, but also for your home.

Well equipped: ceramic cisterns with Dual-Flush for 3- or 6-litre flushing action. Just press the smaller button to further reduce the volume of flushing water.

Perfect unity: same design, different functions. Both toilet and bidet are available as a floor-standing or wall-mounted version.

New: the matching bidet Compact combined with the wall-mounted toilet Compact.

Bathroom-aesthetics: the close-fitting toilet seat with overlapping cover underlines the clear character of the range. Understatement simplified.

High standard: a cleaner bathroom due to an 80 mm ground-clearance on wall-mounted toilets and bidets. One of the many floor-standing variations provides a 100 mm raised seat level. More convenience and quality of life.

Public Relations: urinals for public and semi-public areas. With water inlet from above or from the rear, with target fly upon request.

Unmistakable highlight: the Starck 3 toilet with concealed trap.

Numerous sizes available: e.g. the standard wall-mounted WC and bidet (left) and in the compact version, all with 80 mm floor clearance.

Aesthetics cum functionality, clockwise: wall-mounted toilet and bidet, wall-mounted toilet and bidet Compact, floor-mounted toilet and bidet with cistern and the "back-to-wall" floor-mounted toilet with matching bidet. On the left: the Starck 3 floor-mounted toilet.

Ideal for the public sector, clockwise: the Starck 3 urinal, optional with water inlet from above or from the rear and concealed water supply, the ceramic partition, the floor-mounted toilet with the seat height raised by 100 mm and the and the standard-height version.

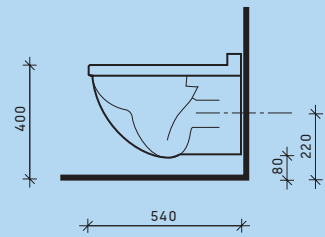

A meaningful addition: the new barrier-free toilet with a 700 mm projection. With all-round water-rim and 3- and 6-litre flushing action, it is ideally suited for use in the public and semi-public sectors. The new toilet seat features a one-piece stainless steel hinge - and also fits all other Starck 3 toilets.

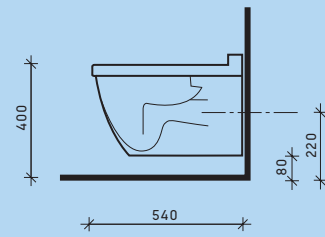

Two made of each other. Starck 3 wall-mounted toilet with 700 mm projection and the Starck 3 barrier-free washbasin. Both from the design studio of Philippe Starck.

“Why do small people enjoy taking a bath a lot more than tall ones?” asked Philippe Starck and developed a tub which offers more design as well as more space and convenience. Thanks to optimal space solutions and an improved backrest, tall people can finally enjoy a full-body bath without being left high and dry, all in a tub that complies with standard exterior measurements. Either as it is or equipped with one of three whirlpool systems, the Starck 3 bathtubs will make you feel like a new person with every bath you take, regardless of your size. Don't forget the shower trays which are available as square, rectangle, pentagon or quarter circle. Among the wide variety of products, Philippe Starck's vision always remains visible: the creation of a bathroom range which is one of its kind. Immaculate. And uniquely comfortable.

Sparkling relaxation: whirlpool with Air-System, Jet System or the combined Air-Jet-Systems, Combi-System P and Combi-System E.

Additional comfort features upon request: foot- and back-massage, each with adjustable rotating jets. Water temperature is controlled by an inline heater. A halogen lighting element creates a relaxing atmosphere.

Archetypical yet generous: the bathtub with minimal exterior measurements offers maximum space and convenience. Also for two people.

Variety of shapes: four tubs, one design. Sizes from 1600 mm to 2000 mm.

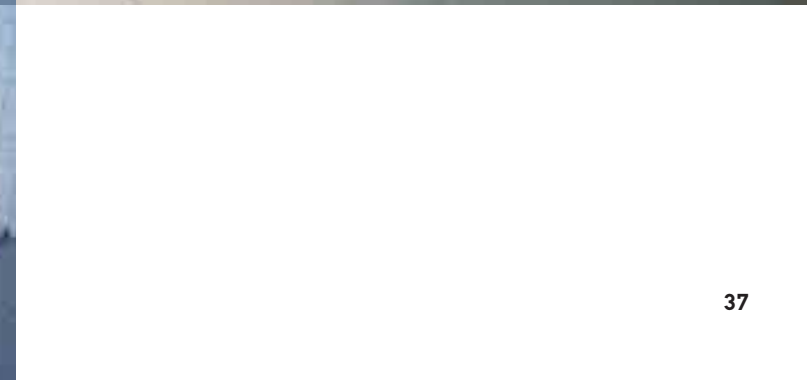

Spotlessly clean: the standard equipment provides for full-system drainage. Upon request, all systems can be equipped with hygiene management system providing maximum peace of mind.

Convenient: extra-long backrest with integrated headrest. Additional convenience: Soft-Headrest – made from a hygienic, easy-to-clean synthetic material.

Corresponding shapes: Starck 3 shower trays, in either a square, rectangular, pentagon or quarter circle shape. Built-in or with integrated panel.

Variety of shapes, clockwise: the basic shapes of the Starck 3 shower trays, quarter circle, pentagon, square, rectangle. Shower trays are made of sanitary acrylic and are available as built-in version. The quarter circle and pentagonal trays are also available with integrated panel.

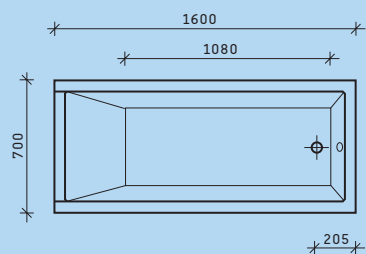

Bathtime enjoyment – alone or à deux: on the left the two-seater Starck 3 whirltub 1800 x 800 mm, with Combi-System E, hygiene management and two headrests. Wellness at the touch of a button: via the control panel (small picture, lower left-hand corner), you can regulate the Air- and Jet-System and the rotating jets for the respective whirlpool function – as well as the mood-creating underwater lighting (from upper left to lower right).

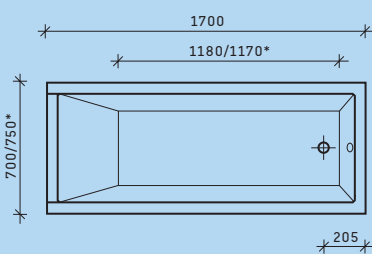

Mood change: when touched, the unobtrusive operating unit of the Combi-System L lights up in blue (small picture centre and right).

Additional modules for Combi-System E

Back-Massage

3 adjustable rotating jets have a beneficial effect on the back.

Foot-Massage

2 adjustable rotating jets are stimulating the reflex zones of the foot.

Lighting

1 underwater light, 50 W halogene, creates a cosy atmosphere in the bathroom.

Inline Heater

Electronically controlled thermal system to compensate for loss of temperature during whirl action.

Hygiene Management

Electronically controlled cleaning system for the desinfection of the jets and pipes of the whirlsystem.

Additional modules for Combi-System L

Coloured Light

The tub is flooded with light that changes colour constantly. Five light elements integrated into the side wall allow the user to select a colour in accordance with the atmosphere. Halogene spot is going to be replaced.

Temperature L

Heating module with blue backlit LCD display and control. This system can be used to heat the whirlpool to the desired temperature.

UV Hygiene Management

Simple, environmentally-friendly hygiene by means of automatic UV disinfection.

The standard equipment of Duravit Whirlsystems provides full system drainage as well as pop-up waste and overflow fitting, chrome.

71.... 1 .. 10

Airsystem
 Warm air is injected into the bath by 12 jets embedded in the floor of the tub.

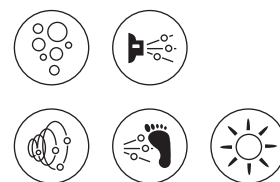

71.... 4 .. 10

Combisystem E
 Special comfort is provided by the electronic control panel of the Combi-System E. The massageintensity of both the Air- and Jet System can be regulated separately by an integrated control panel. An electronic system protecting the Air- and Jet-System against overheating is included as standard equipment. The Combi-System E can be equipped with the following additional modules upon request: Back- and foot-massage, inlineheater, hygiene management, lighting.

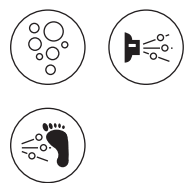

71.... 2 .. 10

Jetsystem
 6 side mounted jets create maximum hydrotherapeutic action with actuated intensity of the massage, freely regulated via an air control regulator which is integrated in the rim of the tub.

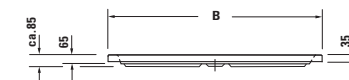

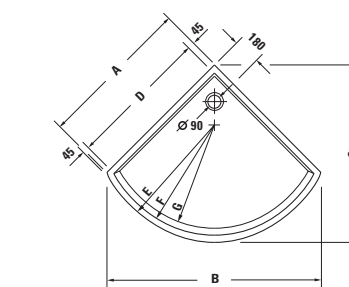

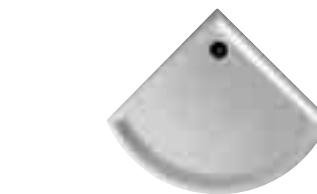

71.... 5 .. 10

Combisystem L
 When activated, the control unit lights up blue. The air and jet systems, included as standard, as well as the halogen spot and the back and foot massages, are easy and convenient to operate. An electronic system protecting the Air- and Jet-System against overheating is included as standard equipment. The coloured light, the temperature L and the automatic UV hygiene management modules can all be added to the Combi-System L.

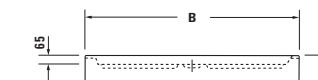

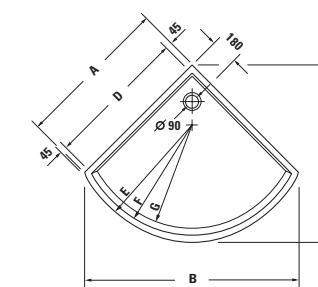

71.... 3 .. 10

Combisystem P
 A complete combination of hydrotherapy combining the Air- and Jet-System to provide excellence in system management. Additionally the system is equipped with 2 rotating jets for a footmassage. This function can be regulated with 2 pneumatic push-buttons and 1 air control regulator integrated in the rim of the tub.
